

Pricing Policy

At U2 Group, we believe in transparent, fair pricing that reflects the value and expertise behind each architectural service or product. Our pricing is dynamically calculated through our integrated **project calculator**, available directly on our website.

1. Pre-Designed House Plans (Marketplace)

- Each plan is priced based on its unique features and complexity.
- The total cost is calculated in real time using our **interactive calculator**, which takes into account elements like square meters, number of rooms, bathrooms, parking spaces, and optional features.
- You can customize your order through the calculator, and the total cost will adjust accordingly—no surprises at checkout.

2. Custom Architectural Design Services

- For personalized projects, pricing is also generated through the **project calculator**.
- Once you've selected your preferences and submitted your project request, we will confirm the details and send you a formal quote including scope, timeline, and deliverables.
- The final price may vary slightly if the scope changes during development, but any adjustments will be communicated and approved in advance.

3. Add-Ons and Optional Features

- Certain optional features—such as outdoor kitchen, interior design service, or laundry room—can be selected in the calculator.
 - These features are clearly marked and priced individually, and they automatically update the total value of your project.
-

4. International Payments and Currency

- All prices are shown in **U.S. Dollars (USD)**.
 - We accept secure international payments through **Stripe**, which also handles currency conversion at the current exchange rate.
 - The total price at checkout reflects your selections and includes all applicable charges—**no hidden fees**.
-

5. Taxes and Local Building Codes

- Taxes may apply depending on your location and will be calculated at checkout if applicable.
 - It is your responsibility to ensure that any pre-designed plan complies with **local construction laws and regulations**.
-

6. Pricing Updates and Promotions

- Pricing may change over time based on material updates, features, or promotions.
 - However, the price shown at the time of checkout is the final price you will pay.
 - Any limited-time offers or discounts will be clearly marked in the calculator interface or on the relevant product pages.
-
